

Overview

The chapter **“Registration and Setup”** describes the introduction to Surface Solutions – from creating a new user account to fully configuring the company profile.

First, it explains how to [register via the website](#), activate your account, and then log in to the application. This is followed by the [setup process](#), which starts automatically upon the first login and guides you step by step through all relevant company information.

Once the setup is complete and the company profile is fully configured, you can immediately begin working in Surface Solutions – creating offers, performing [calculations](#), and managing orders.
